

To Lab Manager

I would like to bring it to your attention that I had a nice clinic experience for once at your clinic. I have been coming there for awhile now to see Dr. Mesogunda and for the first time had a very pleasant lab woman help me. I did have to wait a short while for her but she was nice and thanked me for my patience and I didn't feel a thing when she drew my blood. I had actually thought about finding another Dr. for my arthritis but may wait now. It's nice not to feel like you somebody's pin cushion every time you need your blood drawn. I hope whoever this lady is might be around at my next appointment. I just thought you should know. Just the overall atmosphere at the clinic seemed nice.

Thank you
from a satisfied patient
